

Preserving Liberty One Vote at a Time

The Abigail Adams Project puts the power of information in the hands of the American voter. This unique qualities of this project make it an effective tool to elect Statesmen to public office who will uphold traditional American values:

No Party Affiliations: The Abigail Adams Project is not affiliated with one particular party. We are more concerned with finding individuals who will uphold and restore our constitutional values. We recognize that people from all parties can deceive us.

Simplicity: We provide simple straight forward questions for candidates to answer and easy to read "voter guides" for voters.

Qualified Answers: We will use voting records and public speeches to qualify the candidates answers and will make a clear notation of discrepancies on the voter guide.

Accountability: If candidates refuse to return the survey, we will mark on the voter guide "refused to answer". It is in their best interest to participate!

Candidate Participation: Voter guides provide candidate responses with no additional commentary to the voter. In other words, **you** decide based on your values who the best candidate is.

*We have completed a Voter Guide for the US Senate Race in Utah.
We invite all precinct chairs to share our website with their members.
The voter guide and candidate responses can be accessed at*
